

CPU

The diagram shows a computer architecture layout. At the top left is a small rectangle labeled 'CPU'. Below it is a large rectangle labeled 'Registers' at its bottom center. To the right of the 'CPU' rectangle is a very large rectangle labeled 'Memory' at its bottom center. The 'Registers' rectangle is positioned such that its top edge is below the 'CPU' rectangle, and its bottom edge is above the 'Memory' rectangle. The 'Memory' rectangle is to the right of the 'Registers' rectangle, and its top edge is above the 'Registers' rectangle. The 'CPU' rectangle is to the left of the 'Memory' rectangle, and its bottom edge is above the 'Registers' rectangle.
